

Hybrid Power Scooter – FreedomChair Model S1

With the renowned FreedomChair quality, this compact and foldable scooter is equipped with twin motors and off-road tyres to provide a transportable scooter that can really explore places.

Features

Seat Width: 17in height adjustable
Wheelbase: electrically adjustable
User Weight Limit: 120kg

All Wheels: 12" x 3.5" pneumatic tyres
Motors: 2 x 250W continuous / 300W peak
Batteries: 2 x lithium-ion with a range up to 30km

For a customer considering a mobility scooter for general use, but would like the ability to explore further afield. The S1 Scooter does not have the bulk and heaviness of off-road scooters nor the fragility and instability of folding scooters. The hybrid S1 scooter from FreedomChair is built to venture afar, yet simply folds flat for easier transportation and storage at home. Equipped with two powerful motors that proportionally adjust to the steering angle, the scooter can tackle more challenging terrains. Its platform length is electrically adjustable and the seat can be raised or lowered.
